

MASSACHUSETTS INSTITUTE OF TECHNOLOGY

CAMBRIDGE 39, MASSACHUSETTS

Department of Electrical Engineering

January 30, 1953

Mr. E. J. Dieterich, Head
Computer Research Section
Raytheon Manufacturing Co.
Waltham 54, Mass.

Dear Mr. Dieterich:

Many thanks for your inquiry of January 21 concerning possible doctoral students that may be employed by your company in the field of computers.

I shall inquire from among the department faculty about the probable plans of some of our students. I suggest also that you register your needs with the Institute Placement Office, so that they will keep this matter before the attention of the graduates. I will also pass the word along to Prof. Morse and to Mr. Forrester.

May I suggest that you contact Dr. Frank Verzuh to see whether he would be interested in your proposition. While at the present time Dr. Verzuh is in charge of our Office of Statistical Services, our policy is always to bring before such people opportunities for their advancement. Dr. Verzuh is highly skilled in the field of your interest and currently teaches one of the graduate subjects that we offer in our sequence of courses on computation.

The best way for us to arrange a time when you might visit me would be for you to telephone at your convenience and make a date.

Very truly yours,

GSB:EJM

cc: Prof. C. E. Tucker
Prof. P. M. Morse
